Abraham Tikuye

Product & Technical Project Profile

Timisoara, Romania | linkedin.com/in/abraham-tikuye-31a485283/ | github.com/abrahamt17

Engineering Management student with a software and AI background. Frames problems from the user's side, writes clear specifications and phased roadmaps, and can build the first version himself. Looking for associate product, product analyst or technical project coordination roles.

PRODUCT & PROJECT WORK

AgentCover — Founder, product and technical development

Phase 1 built. A product specification and phased roadmap for a new kind of risk, with Phase 1 built and the rest honestly marked as planned.

- Framed a new problem, the risk created by autonomous AI agents, and identified two user groups.
- Wrote the product overview, architecture, security notes and a phased roadmap.
- Scoped Phase 1 to the foundation every later module depends on, and delivered it.
- Kept planned modules visibly separate from built ones in the product and its documentation.

AeroMind — Co-founder, product and prototype development

Working prototype, not deployed. One hypothesis, assessment-to-development, turned into a complete two-sided journey and a deliberately narrow MVP.

- Co-founded the project around one hypothesis: linking professional assessment to ongoing development.
- Mapped the journey for two user roles and delivered it end to end as a working prototype.
- Cut the MVP to trainees and psychologists; flight schools, airlines and payments are deliberately out of scope.
- Wrote product guardrails for a sensitive domain, including what the product must never claim.

EXPERIENCE

AI Engineer — AiGot SRL

Italy

- Worked on AI-focused software and automation initiatives in a company developing technology products and SaaS solutions.

Software Developer — National ID Ethiopia (Fayda)

1 year · full-time

Ethiopia

- Designed and implemented the frontend for a grievance management workflow used by operations staff.
- Organised the interface around how a case is found, inspected and updated.

SIC competition — Contender, technical product lead

- Competed with a team entry where I led the technical side: I built the product, managed my teammates, and worked on the business plan.

EDUCATION

Engineering Management studies — Università degli Studi di Perugia

2024 – present

Perugia, Italy. In progress.

Erasmus mobility — Universitatea Politehnica Timisoara

Timisoara, Romania. Exchange period within the Engineering Management studies. Not a separate degree.

Undergraduate studies in Computer Science — University of Gondar

2021 – 2024

Gondar, Ethiopia. Did not complete the degree.

SKILLS

Product: Problem framing, Product specification, Roadmapping, Feature prioritisation, Stakeholder mapping
Delivery: Scope definition, Phased planning, Technical documentation, Risk and dependency tracking
Technical base: TypeScript, React, Next.js, PostgreSQL, LLM integration, Automated testing
