Abraham Tikuye

Technical Marketing Profile

Timisoara, Romania | linkedin.com/in/abraham-tikuye-31a485283/ | github.com/abrahamt17

Technically trained communicator with a software and AI background and Engineering Management studies. Understands products at the level of the code, and explains them plainly: what they do, who they are for, and what they do not do. Seeking an entry-level technical or product marketing role; marketing experience so far comes from his own products.

POSITIONING & COMMUNICATION WORK

AgentCover — Founder, product and technical development

Phase 1 built. Explaining an emerging problem, AI agent risk, to European organisations without overstating what the product does.

- Defined the positioning: risk intelligence for AI agents, clearly distinct from being an insurer or broker.
- Wrote the public site: home, how it works, about and security pages.
- Explained an unfamiliar problem to a business audience before presenting any feature.
- Built a demo preview with clearly labelled synthetic data so the product can be shown honestly.

AeroMind — Co-founder, product and prototype development

Working prototype, not deployed. Positioning a specialised product for trainee pilots and psychologists without claiming to be first, unique or clinical.

- Positioned a specialised product for two audiences: trainee pilots and aviation psychologists.
- Reviewed existing aviation assessment tools and set a rule against 'first', 'only' or 'unique' claims.
- Wrote careful product language for a sensitive domain: educational, not clinical.

Grievance Portal Showcase — Frontend developer

Public showcase. A careful public showcase of internal work, using mock data only.

- Turned internal internship work into a public showcase with mock data and a clear written account of my contribution.

EXPERIENCE

AI Engineer — AiGot SRL

Italy

- Worked on AI-focused software and automation initiatives in a company developing technology products and SaaS solutions.

Software Developer — National ID Ethiopia (Fayda)

1 year · full-time

Ethiopia

- Designed and implemented the frontend for a grievance management workflow.
- Documented the work for a public audience without exposing internal details.

SIC competition — Contender, technical product lead

- Competed with a team entry where I led the technical side: I built the product, managed my teammates, and worked on the business plan.

EDUCATION

Engineering Management studies — Università degli Studi di Perugia

2024 – present

Perugia, Italy. In progress.

Erasmus mobility — Universitatea Politehnica Timisoara

Timisoara, Romania. Exchange period within the Engineering Management studies. Not a separate degree.

Undergraduate studies in Computer Science — University of Gondar

2021 – 2024

Gondar, Ethiopia. Did not complete the degree.
