ABRAHAM TIKUYE

AI & TECHNOLOGY | PRODUCT & PROJECT MANAGEMENT

Timi■oara, Romania | tikuyeabraham@gmail.com
abrahamt.vercel.app | linkedin.com/in/abraham-tikuye-31a485283 | github.com/abrahamt17

PROFILE

Technology and product-oriented professional with a foundation in Computer Science studies, hands-on software development experience and ongoing Engineering Management studies. Interested in applying AI and software to real problems, while bringing a product and project perspective to how solutions are shaped, built and delivered. Combines technical curiosity with an interest in product development, technical project coordination and engineering management. Currently developing knowledge of technical marketing.

CORE STRENGTHS

AI-enabled product development • Software engineering • Product thinking and problem framing • Technical project planning and coordination • Requirements exploration • Prioritization • Cross-functional collaboration • Technical communication

EXPERIENCE

AI Engineer | AiGot SRL

Dates / engagement type to confirm

- Contribute to AI-focused engineering work in a technology company.
- Work at the intersection of applied AI, software development and product-oriented problem solving.
- Add specific systems, frameworks, responsibilities and outcomes once confirmed; no unverified technical claims included.

Developer / Software Development Intern | Fayda — Ethiopia’s national digital identity programme

July–September 2024 (from prior profile information)

- Gained software-development experience in the context of a large-scale national digital identity initiative.
- Worked in a technology environment supporting digital identity services.
- A supervisor recommendation highlighted initiative and willingness to take on responsibilities beyond the initial assignment; specific deliverables and technologies should be added when verified.

SELECTED PROJECTS

AgentCover | Founder | AI-agent risk and insurance concept

Exploring risk assessment and insurance infrastructure for autonomous AI agents, including how emerging agentic systems may create new operational and liability risks. Product concept and development scope should be represented according to the current repository/demo status.

AeroMind | Co-founder | Aviation-focused technology product

Co-developing an aviation-oriented product concept, with an emphasis on identifying a problem, shaping a product direction and exploring technology-enabled solutions.

Payroll Management System | Software project

A software project focused on payroll workflows. Add implemented features, architecture, stack and demo/repository link after reviewing the codebase.

Selected earlier projects | Independent / academic development

Song-Manager, Netflix Clone, Airline Reservation System and React Messenger — earlier application projects demonstrating practical exploration of web development and application workflows.

EDUCATION

BSc Engineering Management | University of Perugia, Italy

Studies in progress

Erasmus+ Exchange | Politehnica University Timi■oara (UPT), Romania

Autumn 2026 – 21 February 2027 (official mobility end date)

Computer Science studies | Three years of study; degree not completed

Prior studies

SKILLS & TOOLS

Software & web: JavaScript, React, Next.js, React Native, Redux, Tailwind CSS, HTML, CSS

Programming exposure: PHP, Java, C++

Data & integration: MySQL, MongoDB, Firebase, REST APIs

Tools: Git, GitHub

AI & technology: AI engineering interests, AI-enabled product concepts, automation and emerging technologies

Product & delivery: Product development, problem framing, requirements exploration, prioritization, project planning, technical coordination

Developing interests: Technical marketing, product positioning and communicating technical value
